

Arbor Biotechnologies to Present at the 41st Annual J.P. Morgan Healthcare Conference

CAMBRIDGE, MA – January 4, 2023 – Arbor Biotechnologies, a biotechnology company discovering and developing the next generation of genetic medicines, today announced that its Chief Executive Officer, Devyn Smith, Ph.D., will present at the 41st Annual J.P. Morgan Healthcare Conference on Wednesday, January 11, 2023 at 1:30 p.m. PT.

About Arbor Biotechnologies

Arbor Biotechnologies is a next-generation gene editing company focused on discovering and developing potentially curative genomic medicines. Founded by Feng Zhang, David Walt, David Scott, and Winston Yan, our proprietary discovery engine is focused on discovering genetic editing capabilities spanning knockdowns to whole gene insertions, which has enabled us to generate the most extensive toolbox of proprietary genomic editors in the industry to date. Leveraging our wholly-owned nucleases as the chassis for genetic modification, we can work backward from disease pathology to choose the optimal editing approach that specifically addresses the underlying cause of disease, resulting in a potentially curative medicine for a wider range of genetic disorders. As Arbor continues to advance its pipeline toward the clinic with an initial focus in liver and CNS disease, the Company has also secured several partnerships around gene editing and ex vivo cell therapy programs to broaden the reach of its novel nuclease technology.
