

## **Arbor Biotechnologies to Present at the Bank of America Global Healthcare Conference**

**CAMBRIDGE, MA – May 3, 2022**– Arbor Biotechnologies, a biotechnology company discovering and developing the next generation of genetic medicines, today announced its participation in the upcoming Bank of America Global Healthcare Conference in Las Vegas, NV.

Arbor's CFO, Steven Favaloro and CTO, David Cheng will present a corporate overview in person on Tuesday, May 10, 2022 at 11:50 a.m. PDT (2:50 p.m. EDT).

A webcast of the presentation will be accessible through the News Section of the company's website at [www.arbio.bio](http://www.arbio.bio), with a replay available for 90 days following the event.

### **About Arbor**

Arbor Biotechnologies is a life sciences company discovering and developing the next generation of genetic medicines based on wholly owned genomic editors discovered from its machine learning/AI driven discovery platform. Since its founding in 2016 by Feng Zhang, David Walt, David Scott and Winston Yan, Arbor has built the most extensive toolbox of proprietary genomic editors in the industry. Using the discovery platform, Arbor can discover, screen, and engineer novel editing enzymes and effectors that can then be tailored to the underlying cause of disease to result in potentially curative medicines for patients. As Arbor continues to advance its pipeline toward the clinic with an initial focus in liver and CNS disease, the Company has also partnered with Vertex Pharmaceuticals on several gene editing and *ex vivo* cell therapy programs to broaden the reach of its novel nuclease technology.
